

At Coal Creek station we saw where our power is made.

Coal Creek Station power plant

The view from the roof is awesome.

The giant cooling tower

Memories of the
Coal Creek
Tour

Inside Coal Creek Station

The control room

We walked along side the giant turbines that make the electricity

At Falkirk Mine

Giant coal trucks

Our group does some coal mining

Our tour bus parked next to a giant shovel, can you believe how big it is?

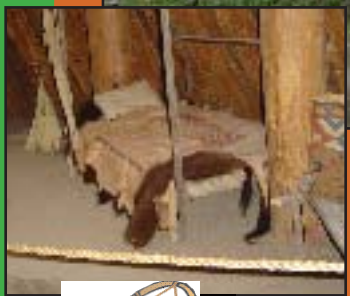

The shovel at work

and later that day...

We stopped at the Lewis and Clark Interpretive center. Above, a sod hut. Inside the hut, we saw and heard how Native Americans lived.

And at the end of our interesting day, a riverboat dinner cruise, complete with authentic host.

3-Day Coal Creek Tour
