

Welcome,

Thank you for contacting East Central Energy (ECE) regarding the installation of a new electric service. Our goal is to make the process of obtaining your new service as easy as possible. By following the steps below, you ensure there are no unnecessary delays.

- Step 1:** Complete the **New Commercial Service Information** form and return to:
East Central Energy, Attn: New Services, P.O. Box 39, Braham, MN 55006-0039 or email to newservice@ecemn.com. An ECE representative will contact you for your federal tax ID number.
- Step 2:** Take a moment to consider ECE's money-saving water heating, space heating, and air conditioning programs. If you already know the programs in which you plan to participate and the size of the system to be installed, include this information on the *New Commercial Service Information form*. This will allow the staking engineer to assist you in proper design of your new electric service and avoid unnecessary delays.
- Step 3:** Refer to the enclosed Commercial New Service Guidelines list of requirements that need to be completed before construction of your new service can begin.
- Step 4:** A Federal Tax ID # is required for all commercial services. If you are not an existing member, a deposit of \$500 may be required. A credit check may also be completed. Deposits for commercial accounts are returned as a bill credit, with interest, after 36 months of on-time payments without penalties.

If you have questions or need additional information, please call 1.800.254.7944, choose option 4, then enter ext 6440, or email newservice@ecemn.com.

Sincerely,
East Central Energy

- If you are planning on doing landscaping, remember to plan before you plant. Please visit our website for information regarding trees and power lines.
- Underground services built between November 1 and March 31 will incur winter construction charges.
- For the full version of the rate schedule call 1-800-254-7944 or visit eastcentralenergy.com.

ECE is an equal opportunity provider and employer. Find the Statement of Non-Discrimination for ECE at eastcentralenergy.com select About Us, or call 1-800-254-7944.

Please describe. 			

NOTE: this information is for design purposes only. A commercial service coordinator will contact you and send you a Membership Application and Agreement to sign and return.

Commercial New Service Guidelines

To initiate your commercial new service, the following must be completed:

_____ Submit completed **New Commercial Service Information** form with the following information:

_____ Indicate whether you would prefer overhead or underground service, single or three phase, voltage required and service size.

_____ Provide the name of your electrician, primary project contact and business/property owner.

_____ Submit a site plan that indicates the location of the structure, sewer, well, driveway and where you would prefer the transformer location.

After completing all of the above, ECE will schedule a staking engineer to measure footage, calculate charges, mark the exact location of pole or transformer, and determine if any permits or easements are required.

After site visit, the following must be completed before construction of your new service is scheduled.

_____ Submit completed **Membership Application and Agreement** form.

_____ Complete all requirements on the **New Service/Service Upgrade Checklist**.

_____ Submit a **Request for Electrical Inspection**. *This will be provided by your electrician and is required if you are building in Minnesota.* For self-wire Minnesota and Wisconsin requirements, see self-wiring responsibility section listed on the next page.

_____ All charges must be paid in full and all permits* and easements received (if required) before your new service or service upgrade can be released for construction.

_____ If a deposit is required, it will be added to your first bill.
Your deposit gains interest while it is held and will be refunded after 12 consecutive months of on-time payments.

*Permits paid to other agencies may not be refundable.

Self-wiring responsibilities are as follows:

_____ Inform ECE when the meter socket is installed, the secondary line is connected in the meter socket and plowed to our transformer location or pole site. Provide 30' of excess line for a pole top connection, 10' of excess line for connection to an underground transformer.

_____ For Minnesota - Submit a Request for Electrical Inspection (affidavit) through the MN Department of Labor and Industry. Affidavit forms, instructions and fee schedules are available at www.dli.mn.gov, phone: 651-284-5026. A copy of the permit number must be sent to ECE, and the homeowner should retain a copy for their records. All self-wiring jobs require inspection and approval by a state electrical inspector prior to installation of a new service.

_____ Wisconsin - UDC* - Submit WI Uniform Building Permit application to the inspection agency contracted by the governmental authority (municipality, county, or state) having jurisdiction. This form is provided by the governmental authority or inspection agency. Service must be inspected and approved by the inspector prior to installation.

_____ Wisconsin - non UDC** - Submit a wiring affidavit to ECE stating compliance with WI and national electrical code prior to installation. Affidavit can be provided by ECE upon request.

*Uniform Dwelling Code (UDC) services: Any one or two family dwelling that does not fall under category 3 or 4 below.

** Non-UDC services:

1. Alterations or additions to existing dwellings. (or existing service upgrades)
2. Manufactured homes regulated by the federal government.
3. Dwelling that were issued a WI (UDC) permit prior to 1/1/05 and footings & foundation are completed within 2 years of permit issuance.
4. Dwellings that have had their footing & foundation completed prior to 1/1/05.
5. Commercial, agricultural, or residential outbuildings.

Important: To help us expedite your new service, please provide as much information as possible. Be sure to provide your contact information, including home, work, and cellphone numbers, and email address, so we can reach you if we have any questions or concerns about the construction of your new service.

Please call 1-800-254-7944, menu option 4, with questions.

Service coordinators are available Monday through Friday, 7 a.m. to 3:30 p.m.

Construction Charges

Important: all required charges must be paid before your electric service is scheduled.

Service to Structure or Dwelling

Single Phase Service - Overhead and Underground

\$600 connect fee (when no construction is required)**

\$600 Contribution to Construction and \$9 per foot

An *additional* \$14 per foot will be assessed for road push or directional boring segments, as defined by ECE.

If underground construction takes place between November 1 and March 31, additional winter charges will apply.

Underground Service Single Phase:

If the meter socket is to be located on a structure, or by a mobile or manufactured home, the electrician (or homeowner) will provide and install a meter socket. Underground secondary wire is connected to the meter socket and run to ECE's transformer leaving a 10 ft. coil of wire. The wire must be connected to the meter socket before ECE will energize the service. There will be a \$600 Contribution to Construction fee. The "Request for Inspection" form will be filed by the electrician (or homeowner) with the State and with ECE. If self-wired, the service must pass electrical inspection before it will be connected by ECE.

Overhead Single Phase service:

If the meter socket is to be located on a structure or by a mobile or manufactured home, the electrician (or homeowner) will provide and install the underground secondary wire to a meter socket. The underground secondary wire is connected to the meter socket and ran to the pole, leaving at least 30 ft. of wire for ECE to run up the pole and connect at the top. This service has a \$600 Contribution to Construction fee. The underground secondary wire must be connected to the meter socket before ECE will energize the service. The "Request for Inspection" form will be filed by the electrician (or homeowner) with the State and with ECE. If self-wired, the service must pass electrical inspection before it will be connected by ECE.

Three-phase Line Extension - Overhead or Underground - 1,000 KVA or smaller

\$1,000 connect fee (when no construction is required) **

\$1,000 Contribution to Construction and \$17.25 per foot

An additional \$14 per foot will be assessed for road push and directional boring segments as defined by ECE.

If underground construction takes place between November 1 and March 31, additional winter charges will apply.

Three-phase Line Extension - Overhead or Underground - Services over 1,000 KVA

Cost of service will be determined by an ECE Staking Engineer based on the infrastructure required to service the load.

Platted Developments

Platted Single Phase Developments – Recorded at the County Office

\$2,500 Contribution to Construction and \$9 per foot

An additional \$14 per foot will be assessed for road push or directional boring segments as defined by ECE. If required, directional boring charges will be determined by an ECE contractor estimate.

If construction takes place between November 1 and March 31, additional winter charges will apply.

Service Connections within Platted Developments – Connect Fee, Per Service

\$600 connect fee (when no construction is required) **

Platted Three Phase Developments – Recorded at the County Office

\$2,500 Contribution to Construction and \$17.25 per foot

An additional \$14 per foot will be assessed for road push or directional boring segments as defined by ECE. If required, directional boring charges will be determined by an ECE contractor estimate.

If construction takes place between November 1 and March 31, additional winter charges will apply.

Platted Developments - continued

Platted Industrial Developments – Recorded at the County Office

The customer will be billed the installed cost of the project. An estimated project cost will be required to be paid before construction begins. At the completion of construction, the customer will receive an invoice or refund for the amount over or under the paid estimate.

Miscellaneous Charges/Requirements

Winter Underground Construction Charge

An additional \$6 per trench foot will apply to any underground construction from November 1 through March 31. This is nonrefundable and applies to both line footage and road push footages.

Other Options Available

Right-of-way trimming for new service: Contractor Estimate

Co-op Owned Outdoor Light Installation

On existing ECE owned pole - \$300

Wood pole installed to accommodate an ECE-owned outdoor light - \$700

If conductor needs to be extended to provide service to the light, there will be a \$9 per foot charge.

If underground construction takes place between November 1 and March 31, additional winter charges will apply.

Easement Recording

There will be a \$75 charge for recording an easement that is needed for a service.

Staking Trip Charge

After the initial site visit by the staking engineer, there will be a \$80 charge for each additional visit to the site (unless it is waived by the staking engineer due to special circumstances).

Crew Trip Charge

There will be a crew second trip charge based on a 2-hour standard (wages and equipment) if the service is not ready for connection on member-owned secondary. The applicable trip charge must be paid before service will be connected.

Wisconsin Electrical Inspections

Uniform Dwelling Code (UDC) requires that all new **one-family and two-family dwellings** require electrical inspection before service is connected. Contact Municipality or WI Division of Safety and Buildings at 608-266-2112 or dps@wisconsin.gov for more information.

Structures not covered by (UDC)- A certificate of compliance stating that all electrical work is compliant with WI state and National Electrical code is required to be filed with ECE before service can be connected. This requirement applies to homeowner or contractor wiring.

**Charges may be subject to sales tax.

(HAND DIG WHEN WITHIN 3' OF ANY UNDERGROUND FACILITIES)

MEMBER'S UNDERGROUND FEED FROM ECE'S TRANSFORMER TO MEMBER OWNED METER PEDESTAL

CALL BEFORE YOU DIG

MINNESOTA 811 OR 1-800-252-1166	WISCONSIN 811 OR 1-800-242-8511
--	--

(HAND DIG WHEN WITHIN 3' OF ANY UNDERGROUND FACILITIES)

Meter Locations

1. All electric meters for new installations and rewires, shall be located on the exterior of the building.
2. All multiple meter socket installations shall have the unit number marked on the face of the meter socket and disconnect.
 - If the meter socket(s) are not clearly and accurately marked, or we are unable to match individual units to the meter socket(s), the building will not be energized until they are properly marked. A new service request must be filed with East Central Energy (ECE) at that time.
3. Meters shall not be located where a hazardous condition exists.
4. Meters shall have safe access.
5. Meters shall be located so they are safe from damage (falling snow, ice, etc.). If any member's facility changes result in damage or the possibility of damage, the member will be required to either move the metering location or provide physical protection for the metering equipment.
6. Meter sockets shall have an unobstructed space of not less than 4 ft. in front and 2 ft. on top.
7. For specifications regarding multiple meters, contact ECE.

SINGLE PHASE SERVICES

1. Meter sockets shall be mounted less than 60 inches but more than 30 inches from the ground, floor, or deck below the meter. Unless specifically rated for multiple conductor use, only single conductors shall be connected to the load side of the meter socket lugs.
2. Where more than one circuit is to be fed from a meter, a junction box shall be installed after the meter.
3. Where the service is of greater capacity than 200 amps (except 320 amp single-phase), the customer shall have current transformer metering installed.
 - A. The CT cabinet shall be on an exterior wall of the building, either inside or outside, or in a cabinet adjacent to the transformer for pad mount installation, but cannot be installed on a pole.
 - B. The CT cabinet and conduit to the meter socket are to be supplied by the customer. For this type of installation, the CT meter(s) and meter socket(s) will be supplied by ECE.
 - C. 480 volt, 320 amp services and smaller may be constructed with a cold sequence meter main or be CT metered.
 - D. Automatic meter reading equipment will be installed.

Metering Requirements	Direct Metering	CT	PT
1 Phase 120/240 Volt 320 Amp and 1 Phase 120/208 320 Amp	X		
1 Phase 120/240 Volt 400 Amp or Larger		X	
1 Phase 240/480 Volt (see also section 3C)		X	X

Transformer Rated Metering

1. Current transformer cabinets for services up to 400 amps shall have a minimum size of 30”H x 24”W x 9”D. For services over 400 amps the current transformer cabinet shall have a minimum size of 48”H x 30”W x 11”D.
2. Current transformer cabinets or switchgear shall be complete with landing pads.
3. The door for the current transformer cabinet or compartment shall have provisions for locking with a padlock and shall be hinged on either side.
4. The meter socket cannot be installed on the door of the current transformer cabinet. It can be mounted on the side if it has a minimum height of 4’ and a maximum height of 6’ to the center of the meter.
5. The current transformer cabinet shall have an unobstructed space not less than 2’ beyond the door in the open position or a minimum of 5’ whichever is greater.
6. Call East Central Energy, at 1-800-254-7944 when all the metering equipment is installed and ready to wire.

Restrictions on Metering Installations

1. **ECE will not permit temporary or permanent jumpers to be installed in the meter socket, which will result in unbilled energy.**
2. ECE will not permit meter socket bypass handles to be in the bypass position, which will result in unbilled energy.
3. No customer wiring or devices are permitted on the source side of ECE’s metering points.
4. Meters and all associated metering equipment and cabinets will be sealed and/or locked by East Central Energy.
5. Unauthorized removal of ECE’s seals and locks is unlawful.
6. ECE may grant permission to a licensed electrician to remove a seal and/or lock for maintenance of member equipment. Call ECE at 1-800-254-7944 for authorization.

Authorization for Variances

1. Any variance to these requirements must have prior written authorization from ECE’s Metering Department.

WISCONSIN CERTIFICATE OF ELECTRICAL INSPECTION

Wisconsin applications only. Before electricity may be provided, this certificate must be completed and returned to East Central Energy indicating that there has been such compliance.

WISCONSIN ADMINISTRATIVE CODE

PUBLIC SERVICE COMMISSION

PSC 114.003 AUTHORITY AND STATUTORY REFERENCES

(2) COMPLIANCE WITH ELECTRIC CODE

(a) A utility must obtain proof of compliance with Volumes 1 and 2 of the Wisconsin State Electrical Code before energizing service. Proof of such compliance shall consist of a certificate furnished by a municipal or other recognized inspection department or officer, or if there is no such inspection department or officer it shall consist of a written statement furnished by the contractor or other person doing the wiring, indicating that there has been such compliance.

(b) A utility shall comply with Volume 1, Wisconsin State Electrical Code when providing electric service.

WISCONSIN STATE STATUTE

101.875 INSPECTIONS

(1) All inspections of electrical wiring shall be performed by inspectors certified by the department.

(2) Any rule promulgated under s. 101.82 (2m) may not require the inspection of any of the installation, repair, or maintenance of electrical wiring within an existing industrial facility or an existing manufacturing facility unless the plan for the installation, repair, or maintenance is required to be examined under s. 101.12 (2) by the department or by a municipality that has its examinations accepted by the department under s. 101.12 (3) (a), (am), or (b).

101.88 COMPLIANCE AND PENALTIES

(1) Every person installing, repairing, or maintaining electrical wiring shall use materials, methods, and equipment that are in conformance with the rules promulgated by the department under this subchapter.

(3) Any person who violates this subchapter or any rule promulgated under this subchapter shall forfeit to the state not less than \$25 nor more than \$500 for each violation. Each day of violation constitutes a separate offense.
