

ENERGY WISE

2023 residential program highlights

Ground Source Heat Pump

- 12.49¢/kWh rate**
- Equals 91¢/gal. LP, 99¢/therm natural gas or \$1.23/gal. fuel oil at 350% heat pump efficiency*
- Not controlled by utility
- Systems with fossil fuel backup may qualify for dual fuel/cycled air rate

Storage Space Heating

- 5.3¢/kWh rate**
- Equals \$1.35/gal. LP, \$1.48/therm natural gas or \$1.83/gal. fuel oil*
- Control: 8 hours on – 16 hours off

Dual Fuel/Storage Water Heating

- 5.9¢/kWh rate**
- Equals \$1.50/gal. LP, \$1.64/therm natural gas or \$2.03/gal. fuel oil*
- Control: Dual Fuel - Max 400 hrs/year – auto backup required
- Control: Storage Water Heating - 8 hours on – 16 hours off

Dual Fuel

- 6.4¢/kWh rate**
- Equals \$1.63/gal. LP, \$1.78/therm natural gas or \$2.20/gal. fuel oil*
- Control: Max 400 hrs/year – automatic backup required

Air Source Heat Pump

- 7.5¢/kWh rate**
- Equals 96¢/gal. LP, \$1.04/therm natural gas or \$1.29/gal. fuel oil at 200% heat pump efficiency*
- Cycled in cooling mode 15 minute control/half hour during system peak periods and controlled on dual fuel strategy in heating mode
- Provides 100% cooling and supplemental heating

Electric Vehicle Charging

- Time-of-use or off-peak storage rates available (refer to electric vehicle program sheet for details)

* LP and natural gas equipment rated 95% efficient, fuel oil rated 85% efficient, electric storage and Dual Fuel equipment rated 100% efficient.

**Reduced rates do not reflect any variable wholesale power cost adjustment that may be required. Rates are subject to change.

Storage Water Heating

Storage Water Heating

- 5.3¢/kWh rate**
- Equals \$1.01/gal. LP or \$1.10/therm natural gas*
- 80 gallons water heater and mixing valve minimum capacity requirement – For systems requiring more storage capacity see chart
- Control: 8 hours on – 16 hours off

Family size	Storage Water Heating Requirements
1-4	80-100 gallons and mixing valve
5-7	100-160 gallons
8-9	200 gallons minimum

*Gas water heater equipment rated at 64% efficient, electric water heating equipment rated 90% efficient. **This reduced rate does not reflect any variable wholesale power cost adjustment that may be required. Rates are subject to change.

Residential high-efficiency and ENERGY STAR® rebates

High-efficiency rebates

\$1,250 for qualifying air source heat pumps (see *air source heat pump program sheet*). Ductless air source heat pump: \$400 for qualifying units. Electric vehicle level 2 charger: \$750.

Storage water heating rebates

New high-efficient electric storage water heater or conversion of existing uncontrolled electric water heater to high-efficient electric storage water heater: up to \$700 (see *storage water heating program sheet*).

Storage space heating rebates

\$100/kw for ECE approved systems (see *storage space heating program sheet*).

ENERGY STAR® rebates*

New refrigerators and freezers with recycling of existing unit: \$25, dehumidifier: \$25, electric clothes dryer: \$25, ground source heat pump: \$400/ton, heat pump water heaters: \$100

Wi-Fi-enabled thermostat rebate* \$25

ECM (electronically commutated motor): \$25
(Replacement only—new furnaces do not qualify)

Pool air source heat pump: \$400

Vehicle engine block heater timer: outdoor rated \$15

*One rebate per member household.
